Grounding Bar for 19" Rack (0.2"H x 0.75"W x 20.2"L)

Safety first—be sure to properly ground your equipment.

Grounding Bar installed in a 19" Rack

FEATURES

- Heavyweight copper or copper alloy provides the best grounding performance.
- Provide a central ground point to protect personnel and equipment from harm.
- Mount at the bottom of each rack to provide a conducting connection between racks.
- Junction plate straps to racks and connects two Grounding Bars together.
- Guaranteed for life!
- Mounting hardware and junction box are included.
- Solid copper for best conduction.

NOTE: Effective grounding ensures continuity. Be sure to use an appropriate grounding system as required by your installation.
